

Avaya one-X Communicator User Manual  
**Setting Up and Logging In**

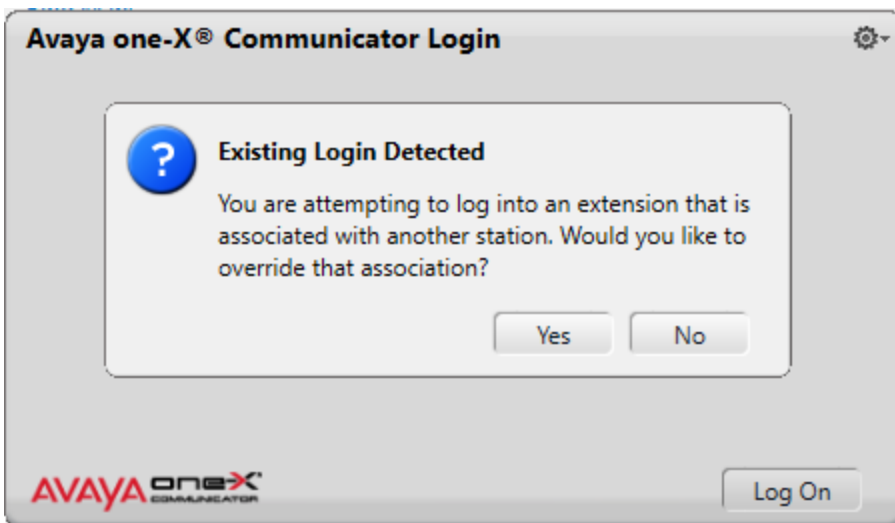

To log into the Avaya one-X Communicator, click on the **Avaya one-X Communicator** icon on the desktop.

If the soft phone needs to be logged in, enter the Extension and Password (1234) and press Enter.

You may see this message if your regular phone is logged in at the office. Click Yes to override the association.

Give the software a few seconds to a couple of minutes to load. While it is loading, your screen will look similar to this:

To ensure the proper settings have been configured, click on the **Menu** button.

Scroll down to **Settings < General Settings**

Under **General Settings**, select **Audio**. [Note: Server should be 172.22.248.60]

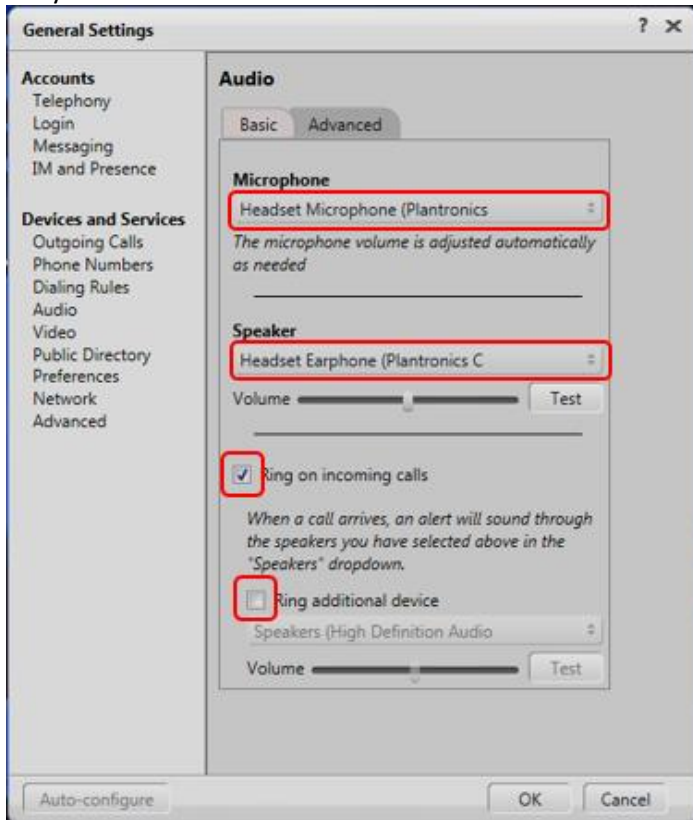

Under the **Basic** tab for Microphone, select *Headset Microphone (Plantronics)*

Under the **Basic** Tab for Speaker, select *Headset Earphone (Plantronics)*

Be sure the *Ring on incoming calls* is checked and the *Ring additional device* is unchecked (optional)

When complete, click on **OK** at the bottom of the window.

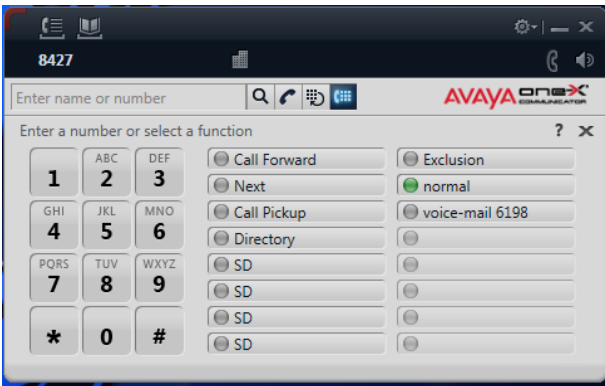

## Avaya one-X Communicator User Manual

To display the softphone dial pad, click on the **Show Dial Pad** button.

Once depressed, the softphone should look like this:

You are now ready to make and take calls!

### Placing Calls

To place a call, simply dial the extension or phone number (be sure to dial '9' to dial outside the college phone system).

### Taking Calls

To take a call, you should hear the phone ring in your headset. Answer by clicking on the green telephone.

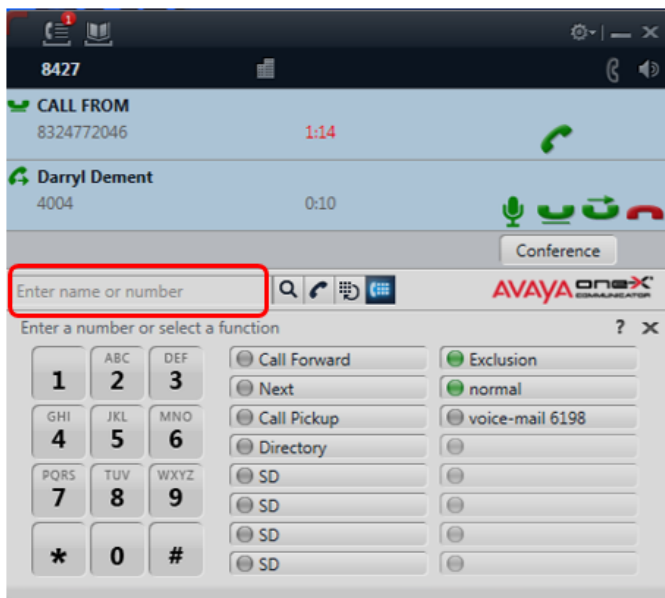

## Avaya one-X Communicator User Manual

To place the call on hold, click on the hold button (see below).

To do a warm transfer, place the caller on hold, and then dial the destination extension in the *Enter name or number* field and press **Enter**. Once the destination number has been entered, you should now see two calls displayed – the original caller on hold and the new extension that is being called.

## Avaya one-X Communicator User Manual

After you reach your destination and acknowledge the transfer, click on the transfer button to route the caller on hold to the destination extension.

## Exiting Out of One-X Communicator

To exit out of the Avaya One-X Communicator application, click on the **Menu** button and select **Exit**. Note that clicking on the X does not log out of One-X Communicator, it will only minimize it. You must click Exit in order to log out.
